

the air quality
flag program

Fly a coloured flag to tell your school what kind of air day it is today!

-  A good air day for everyone.
-  A good air day for most people to get active.
-  An OK air day for some, but others might feel symptoms.
-  There is a lot of air pollution today.

The Air Quality Flag Program lets schools know when the air is good, and shares ideas on how to protect health if the air quality is poor.
